Objective

Seeking entry and experience in coding, programming and software development. Looking to expand upon my skills in creative audio production so that I may work towards a long term goal within digital audio software development.

Work Experience

Flow Team Member   **Target Uptown**   **Oct. 2016 – Dec. 2017**

- Fast, accurate, and detail oriented stocking of products for retail sales floor.

- Worked in a team setting to complete the overall workload of unloading of distribution truck, organized products on pallets according to their stores department.

Sales Associate/Assistant Manager   **Gas Pipe of New Mexico**   **Aug. 2007 – Apr. 2015**

- Assistance to Store Manager maintaining store inventory, ordering/receiving products, bookkeeping, payroll duties, and management of small team of sales associates.

- Worked in a team setting with colleagues to increase overall store sales week by week. Built lasting relationships with customers through exceptional customer service.

Technical Support/Customer Care   **Sitel**   **Oct. 2016 – Dec. 2017**

- First point of contact as Technical Support Agent for People PC internet, and as Game Master for Blizzard's World of Warcraft.

- Developed consistent and productive workflows in a fast paced and high volume work environment in order to meet and exceed monthly performance metrics as outlined by the position duties. Recognized for exceptional customer service and attendance.

Education

University of New Mexico, Albuquerque, NM — Bachelors of Liberal Arts and Interdisciplinary Studies, May 2016, GPA 3.32

Curriculum focused on technical, theoretical, historical, and creative aspects of audio engineering, digital media, music, and film production. Also elected to focus my curriculum towards electronic arts where I was able to work with computing technologies, programming, and hardware interfacing with Arduino within the context of creative coding and the conceptualization of computing technologies in a fine arts setting.

Deepdive Coding Bootcamp, Central New Mexico — In progress

Curriculum in Java programming and Android App Development. Current software endeavors including an Android Application that focuses on procedurally generated music, and working as a team member for an Application extend social networking and alternative interactive capabilities with openprocessing.org
